

Current Limits: Weatherization Program

Effective Date: April 25, 2025

The Office of Housing's Weatherization Program has different income eligibility thresholds depending on the heat source (i.e., electricity, gas, or oil) and whether the housing is renter- or owner-occupied. In certain cases, the Weatherization Program's geographic service area can extend beyond Seattle city limits. Income-eligible households with homes located within Seattle city limits can apply for assistance regardless of the way the home is heated. Income-eligible households who live outside of Seattle city limits but are both a Seattle City Light customer and have an electric-heated home can also apply for assistance.

For more information, please contact Theresa Cortez at theresa.cortez@seattle.gov.
